

EAINDRAY SU PAN

Web Developer

Website: <https://eaindraysupan.tech> | **Github:** <https://github.com/eaindraysupan1005>

Location: Chiang Rai, Thailand, 57100 | **Phone:** +66-968030653 | **Email:** eaindraysupan@gmail.com

Career Objective

Software Engineering student with a strong academic record and hands-on experience building full-stack web and mobile applications. Proficient in React, Spring Boot, FastAPI, PostgreSQL, and RESTful API development through team-based software projects. Seeking a Web Developer Internship to contribute to impactful products, gain industry experience, and further develop my full-stack engineering expertise.

Education

Mae Fah Luang University

Degree: Bachelor of Engineering in Software Engineering | **Expected Graduation:** May 2027

Academic Standing: GPAX - 4.0 | **Relevant Coursework:** Web Application Development, Database Systems, Object-Oriented Design and Programming, Data Structures and Algorithms, Software Modelling and Architectural Design, Mobile Application Development, Software Construction and Evolution

Technical Skills

Frontend: React, React Native, TypeScript, JavaScript | **Backend:** Spring Boot, Node.js, Express, FastAPI

Database: PostgreSQL, Supabase, Firebase | **Tools:** Git, GitHub, Docker, CI/CD

Work Experience

GAO Tek Inc. | *Web Developer Internship* | July 2025 – September 2025

Developed and customized 2 WordPress websites for international clients, improving usability and performance across responsive designs. Optimized website responsiveness and page load performance through CSS refinement and image optimization. Collaborated effectively with distributed international teams in an agile sprint environment, delivering projects on schedule.

Projects

Mental Health App (React Native, FastAPI, Logistic Regression, PostgreSQL)

- Developed and integrated automated email notification services for reminders and alerts using backend APIs.
- Trained and deployed a Logistic Regression model for predictive mood analysis and risk assessment.
- Contributed to FastAPI backend development and PostgreSQL database integration for user and mood-tracking data management.

Eco Habits Tracker & Campaign Platform (React Native, Firebase Auth)

- Implemented secure user authentication and registration using Firebase Authentication.
- Developed a real-time habit tracking system with Firebase Realtime Database for synchronized user activity updates.
- Built campaign participation and progress tracking features using React Native with scalable NoSQL data modeling.

Personal Finance Tracker (Spring Boot, REST API, React, Supabase)

- Designed and implemented full-stack expense and income management features using React and Spring Boot.
- Developed RESTful APIs and integrated a relational database for financial transaction management.
- Built interactive dashboards with weekly and monthly data visualizations to support financial tracking and analysis.
